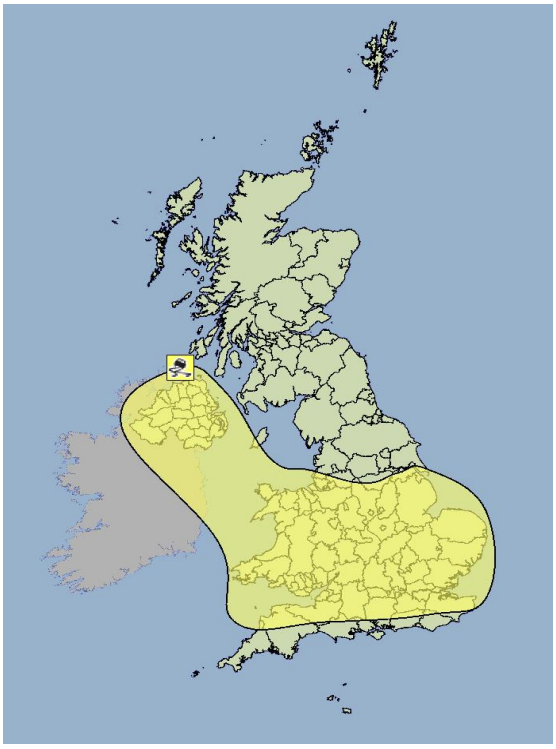
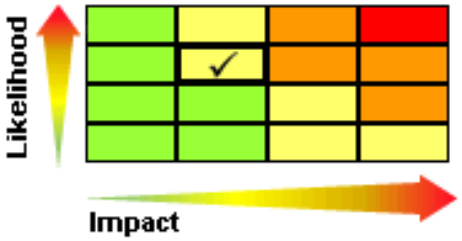
National Severe Weather Warning Service





Chief Forecasters Assessment
A combination of low temperatures and surfaces likely to be wet, from earlier rain and snow or a partial thaw of lying snow, will lead to icy stretches forming on untreated surfaces. A further 1-3 cm of snow occur in places. This warning has been updated to remove the south coastal strip where less cold air is expected to edge in on Friday night.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **00:05 on Sat, 03rd Mar 2018** until **11:00 on Sat, 03rd Mar 2018**

Following earlier spells of rain and snow, icy patches are likely on untreated surfaces during Saturday morning. As a result, driving conditions may become difficult and there is an increased chance of injuries from slips and falls on icy surfaces. In addition, further outbreaks of sleet or snow could occur in places, mainly parts of Wales, central and eastern England.
